Brightwater Testimonial

Future Fitouts engaged Brightwater Business Coaching in February 2014, enrolling in the two (2) year Business Development Program (BDP), completely tailored to work with our business needs and priorities. At the time, Lauren was working in a corporate full time position, wanting to make the move to Future Fitouts, but unsure on timing and whether it would be a good financial / business decision. Aaron was a typical small business owner struggling to find any time to work 'on' the business and working long hours on the day-to-day grind.

Within six (6) months of completing the first component of the program having an in-depth understanding of all aspects of our business and seeing the potential for growth and improvement, Lauren made the move to work part time and dedicated hours to the Brightwater program. The commitment paid off and within the first 12 months Lauren resigned from her corporate position and stepped into a full time role in the business.

In the short amount of time we have been working with Brightwater we have experienced significant growth, implemented a number of systems and are running a more successful and long-term sustainable business. We quickly outgrew our office and had to move into a bigger premise.

We now understand the importance of working 'on' the business to achieve longer term goals and create a financially viable and rewarding business.

Anthony and his team are highly professional, reliable, knowledgeable and full of expertise to offer any business at any stage! Anthony is available anytime to guide you on the business journey and offer advice every step of the way. He has a very friendly, approachable attitude and a strong desire and willingness to see other businesses succeed.

We can't thank Brightwater enough for the difference the program has made to our business and would highly recommend any Brightwater Workshops and/or Programs to any business that wants to run more efficiently, make more money, create more systems and ultimately create more freedom and flexibility.

Like anything, you get out of the program what you put in and the cost is well worth the investment (plus it's cheaper than employing an administration assistant)! It has been one of the best business decisions we have ever made!

We would be happy to discuss our experience in further detail and can be contacted on 1300 368 461.

Kind Regards

Lauren & Aaron Lowe
Directors
